School Exams to Begin June 16

Edmonton — Departmental examinations in Alberta schools will begin this year on June 16. The papers have been set, passed by the revision committee, and are now being printed. The plan introduced last year will again be adopted, providing for examinations only in Grades 11 and 12, all subjects, and in Grade 10 all subjects except literature and composition. In lower grades the recommendations of the teachers will be taken.

Stamp Taxes

An amendment to the special war revenue provides for an increase in the stamp tax on cheques and other instruments. The new rates given below, were effective May 2: Promissory notes, including lien notes, \$100 and under, 3c; over \$100, 6c; bills of exchange every description, drafts lodged for discount, collection or collateral, \$100 and under 3c; over \$100, 6c; cheques, bank drafts, bank money orders, deposit receipts, express orders, travellers' cheques, post office money orders issued in Canada, grain and other produce purchase tickets and other documents negotiated by a bank, \$5 and under, no tax; over \$5 and not exceeding \$100, 3c; over \$100, 6c.

War Veteran Passes Away

John D. McLean Dies in Edmonton; Lost a Leg at Vimy Ridge

News of the death of John D. McLean, war veteran, who formerly lived in Chinook, was received last week.

Mr. McLean passed away in Edmonton of heart trouble on April 24, after an illness of three months duration. He served with the Canadian forces in France and was severely wounded at Vimy Ridge. As a result of which he lost a leg.

He was well known in Youngstown and vicinity, and friends will regret to hear of his demise and sympathize with Mrs. McLean in her loss —Youngstown Plaindealer.

School Fair Board Hold Meeting May 21

A meeting of the officers and directors of the Chinook and District School Fair has been called for by the president, Mr. N. F. Marcy, to be held in the Chinook school hall on Saturday evening, May 21, at 8 p.m.

It is urgently requested that a full attendance of officers and the directors appointed by the schools entered will attend this meeting.

Miss M. Otto, secretary.

Alberta farmers are behind in seeding operations, but as the delay was due to moisture condition, few will complain.

Special Session Held

A special session of the Chinook Chamber of Commerce was held in the dining salon of the Chinook hotel Monday evening, May 9. The president, Capt. C. O. Peters occupied the chair.

Minutes of previous meeting were read and adopted.

A telegram from J. W. Johnston, superintendent of this railroad division was read.

Hurley—McTavish—That the president be appointed spokesman in the interview with Mr. Johnston regarding the suspension of the night operator at the C.N.R. station here. Carried.

Butts—J. Cooley—Land that committee approved for auto camp be adopted as such. Carried.

Hurley—Butts—That work on auto camp as proposed with reference to water, etc., should be proceeded with.

The president appointed L. Cooley to take charge of volunteer work for construction of auto camp. Carried.

L. Cooley—Vanhook—That we table the motion regarding bringing in of settlers pending the absence of Mr. Mumford, chairman of the committee appointed to deal with that question. Carried.

L. Cooley—Vanhook—That we appoint a committee to look after road signs, including direction marks through the town. Carried.

The president appointed the following committee to look after the above mentioned work: Messrs. J. Cooley, Hurley, Lee and Peters.

Vanhook — That we now adjourn. Carried.

Use Your Local Paper

Speaking at a dinner tendered to a large group of Kingston, Ont. men, H. E. Stephenson, of the McKim Agency, told his audience some simple but important truths regarding the building of business. In an informative address, he stated that the best way to sell a product was to tell the truth about it. Because the public read newspaper advertising as a guide to the daily purchasing. When he went on to give some advice to these Kingston business men, advice which is applicable to the business men of any community. He said:

'If you have a local newspaper use it, even if you are located in one corner of the county and can only get value from a part of the circulation. Tell your story from time to time and you will profit by it. The newspaper is an important factor in knitting together a community, and to the extent that you can strengthen it you will be making the paper a stronger medium for your own and the manufacturers' advertising.

'Too many merchants endeavor to sidestep seeing a newspaper man or publisher for fear that they expect them to cough up for some advertising; and too many publishers keep away from the merchants because they feel that this is the merchant's attitude. This is absolutely wrong, as the interests of the two are so bound up with the growth of prosperity of the district that they should work together at all times.'

Teamwork

The one word or term embodying this thing most needed now and most likely to be needed in an increasing way for the long pull back to more satisfactory economic and business conditions is, in our opinion, "Teamwork." If there ever was a time which called for "the long pull and the strong pull altogether," that time is now.

A farmer following his horses as he guides a plough along the furrows knows what teamwork on the part of the horses means; also teamwork between the horses and the ploughman. Possibly he realizes the full value and necessity of such teamwork in an even more striking manner when it is lacking, and, as the outcome, proper results are not being achieved.

Men participating in the many fields of sport have a full appreciation of the value of teamwork. Every successful captain of a team drills it into his men. But how frequently one reads that such-and-such a team, while composed of brilliant and superior individual players, lost out to an individually inferior team because of a lack of co-ordinated effort.—In a word, teamwork.—And this lack of teamwork all too frequently results because one or more of these individually brilliant players desire to keep themselves in the "spotlight," play to the gallery, and win plaudits for themselves rather than for the team as a whole.

Success in military exploits depends to a very large extent upon teamwork, the co-ordination of every arm of the service to the achievement of one common object, the co-operation of each unit with every other unit, both in preparation and final action, to the end that victory be won. Without this "union in service" the bravest men in the world are likely to suffer defeat at the hands of an inferior but more unified force. Victory does not always rest with the big battalions, but with the compact body which moves and acts with precision as one man.

The same principle applies with equal truth and power in the realm of national, political, and community life. If in an army the artillery considered that it, and it alone, was the effective instrument in winning battles, and instead of co-operating with the infantry, tanks, machine-gunners and aircraft, actually ignored and even strove against them, the enemy would win. Yet, how often groups of people having a common object in community effort or in the political arena instead of working together to achieve that object, actually oppose each other solely because they do not agree upon every detail of their programme, nor see eye to eye as to the methods by and through which the reforms desired by all are to be brought about. And the result, of course, is victory for the other group or policy to which they are all opposed.

There are many time-honored maxims which point the truth that teamwork is essential to success. "In union there is strength," "United we stand, divided we fall"; while for the enemy forces there is always the further maxim: "Divide and rule."

Teamwork can only be brought about by a willingness to compromise. Some good people regard the word "compromise" as something essentially wrong, as a great evil. True, right cannot compromise with wrong, nor honesty with dishonesty, but where two are striving for what both believe to be right, and in opposition to what they are agreed is unwise or wrong, it is the height of folly to divide into separate and opposing camps, weakening each other and the cause they both desire to advance, simply because of minor differences of opinion as to exact objective to be achieved or the methods by which it shall be achieved. Unless there is compromise, rather than each one insisting upon acceptance of their views to the exclusion of others, failure for both must inevitably follow and victory be recorded for the common enemy.

The experiences through which the world is passing have impressed a majority of people with the need for more or less radical changes in our economic and social structure. That change is necessary is fairly well recognized, but some desire to move much more rapidly and drastically than others; some believe the remedy for our ills is to be found in another policy; others, again, advocate something else. All want improvement, reform. But through divided councils, lack of co-operation, in a word, an absence of teamwork, nothing but confusion has thus far resulted, while those minorities who are more or less satisfied with things as they are, by working together, are enabled to dominate.

This condition prevails in society, business, community effort, in municipal, provincial, and international politics. It is even found in family life. It is fatal to progress, a continually delaying factor in the onward march of reform.

What the world needs today is not antagonism, but mutual sympathy; not competition, but co-operation; not isolated effort, but co-ordination of effort; not single-handed play, but teamwork. And these things can only be brought about by compromise. So, let's compromise and develop mutual strength through teamwork. The world will then begin to get somewhere, and out of the slough of depression in which it continues to founder.

New Weapon For Surgery

Operation To Remove Cancerous Lung Was Successfully Performed

For the first time in the history of surgery and the treatment of cancer, an entire lung, with a cancer in it, has been removed by the use of the knife, and the patient cured.

This was made known in an interview with Dr. A. L. Lockwood of the Lockwood Clinic, who has returned to Toronto from the annual meeting in Ann Arbor, Mich., of the American Society of Thoracic Surgeons, where the disclosure was made.

During the society's three-day meeting, details of this extraordinary operation were revealed in detail. Dr. Edward D. Churchill, of Boston, Mass., who performed this feat of surgery. The patient's chest was lifted, and all three lobes of the right lung, the centre lobe containing the cancer, were cut entirely away.

Dr. Churchill's case, it was demonstrated, had made it clear that there was one further site of cancer which could be dealt with surgically, which in the past could not be so dealt with at all.

Believed to have been burning from 10 to 15 years a fire has just been discovered under a hospital at Stoke-on-Trent, England.

Saskatchewan now has 136,571 farms and Alberta 97,623.

Trans-Canada Highway

Estimates Announced

Federal Government Contributing Fifty Per Cent. Of Cost

The total estimated cost of work to be carried out on the Trans-Canada Highway under the Unemployment and Farm Relief Act, 1931, approved to May 2, amounts to \$9,996,972. Of this the federal government has agreed to contribute 50 per cent. or \$4,998,486.

This information was laid on the table of the House of Commons by the government in answer to a question of Sir Eugene Fiset (Lib, Rimouski). The federal government has paid to date to each province the following amounts: New Brunswick, \$60,378; Ontario, \$1,875,000; Manitoba, \$251,934; Alberta, \$102,426; and British Columbia, \$257,427. These grants, made in connection with the highway, total \$2,547,169.

The First Bicycle

A Frenchman, M. de Sivrac, is said to have originated the idea for a bicycle. His first machine appeared in Paris during 1690. It consisted of a wooden frame and two wheels. Locomotion was achieved by pushing on the ground with the feet.

Architectural glass with the strength of light building material has been developed at a New York glass works.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Strong, R.R. 5, Pictou, Ont., writes:—"I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks.

My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

'Plane Surprises Natives

Dayaks Of Borneo Wanted To Know If Flying Machines Laid Eggs

The head-hunting Dayaks of Borneo were so intrigued at the sight of their first aeroplane that they wanted to know whether it laid eggs.

Richard Halliburton, of Memphis, who is on a leisurely flight around the world, told the story to associates in New York in a cable from Manila.

The Tennessee flyer's message said he had arrived at Manila at the end of a 40,000-mile flight and had spent three weeks in Borneo with his plane, the "Flying Carpet," visiting the head hunting Dayaks, who never had seen an aeroplane.

"Took the chief flying in native undress, except for goggles," the cablegram said. "Apparently big event in Dayak's history. War boats were filled with warriors who came 100 miles to see the chief fly. Dayaks asked if aeroplane laid eggs."

Used Ancient Seed

Green Peas From King Tut's Tomb Cultivated Near Port Arthur

Green peas, King Tutankhamen's own favorite bean, are growing to top in Pass Lake 25 miles north of Port Arthur. M. Pejstrup is the possessor of more than two hundred of them grown on one stalk.

A year ago Mr. Pejstrup visited his home in Denmark and while there purchased a solitary pea for \$25. He tells that six peas were brought from the tomb of King Tut in Egypt by a Danish missionary and sold for amounts varying from \$25 to \$30, and the one purchased by Mr. Pejstrup was planted here in the Danish settlement last summer.

The stalk of the pea was about five feet tall topped with a cluster of multi-colored flowers. The stem being about half an inch in diameter. From the solitary pea planted a yield of over 200 was obtained.

What the automobile has taught women about household lubrication

Experience with motor cars has taught women that moving parts must be protected against friction by a film of oil. Many of them haven't learned, however, that moving parts of sewing machines, vacuum cleaners, lawn mowers, washers, and other mechanical devices must also be protected against dirt and rust.

3-in-One Oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high grade oils—animal, mineral and vegetable. 3-in-One is the oil you should use on mechanical equipment if you want best results.

Don't risk your expensive household devices by using oil that does only half the job. Insist on the old reliable 3-in-One Oil. It costs little more to buy and much less to use. At good stores everywhere. For your protection, look for the trade mark "3-in-One," printed in Red on every package.

A Sincere Compliment

New Vicar Was Sliced Up As Real Good Sport

The new vicar paid a call on the most wealthy of his parishioners, who was delighted to find that the clergyman was a man of such broadmindedness and with such an interest in sport. After they had discussed the Boat Race and other recent affairs in sport the vicar rose to go. The other, clapping him heartily on the back, said "I think we shall get on very well together, vicar. To tell you the truth I hate those religious parsons."

Like a Grip At the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passage as thousands can testify. It is sold by dealers everywhere.

Called His Bluff

The time had come to dish up the rations, and in an Irish regiment the quartermaster and his assistant had been portioning them out in preparation for distribution.

The assistant turned to the quartermaster and, with a twinkle in his eye, said: "Av ye plaze, sorr, there's a loaf short. Who'll I give it to?" "Keep it yourself," Mike replied the quartermaster.

Camels in the small province of Cirencian, Africa, now number 40,000.

Poison ivy is most virulent at the flowering season.

Radium Found In Ocean

Scientists Claims Vast Stores Are Deposited At Bottom Of The Sea

Vast stores of radium cached in Davy Jones' locker were described by scientists before the American Geophysical Union.

Sediments on the bottom of the Pacific Ocean are from four to nearly 12 times as rich in radium as ordinary rocks on dry land, according to figures quoted by C. S. Piggott, based on samples dredged up from the sea floor. The most radium is in the deeper parts of the ocean bottom, remote from land, and Piggott estimated the total hidden there at about a billion tons.

The radium is sent to the bottom mostly by oxidation in the sea water, while some is carried down by skeletons of tiny sea creatures and dust particles, he explained.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Keep On Working

Despite Disarmament Talk New War Weapons Being Invented

Just as a fillip to the disarmament discussions, we suppose you noticed that Hadfields, Limited, munition manufacturers of Sheffield, England, have developed a high explosive shell that will pierce the best quality of armor plate one foot thick, from a distance of ten miles.

While the world talks much of disarming, the men who sit back and invent new schemes for killing millions keep right on working—and producing results.

A new highway machine invented by an Iowan, digs up the surfaces of old gravel roads, mixes the material with a bituminous binder and spreads the mixture back on the road again.

Cried at Night

"Night after night, as soon as we would get asleep in bed, baby would start crying . . . BABY'S OWN TABLETS changed all this. What a blessed relief," writes Mrs. Arthur Baker, Jr., Winona, Minn.

Baby's Own Tablets for teething troubles, colds, fevers, colic. Absolutely SAFE. 25c package.

Dr. Williams' **BABY'S OWN TABLETS**

Split the Atom

Scientists Pave the Way For Transmuting One Element Into Another

Two British scientists have at last "split the atom," paving the way for transmuting one element into another, the goal of alchemists many centuries ago, and the dream of modern chemists.

Dr. F. D. Cockcroft and Dr. E. T. S. Walton reported the result of experiments in the Cavendish laboratory which culminated in the transmutation of hydrogen atoms into helium atoms, by bombarding them with electric particles.

Dr. Cockcroft said he and his colleague bombarded hydrogen atoms with a voltage of 120,000, and that under the bombardment the hydrogen atoms began to break up into helium, a still rarer gas. The helium atoms, he said, came out of the bombardment with energies of 100 to 160 times those of the particles fired into them.

Only one particle broke up, however, for every 10,000,000 particles used to bombard it, he said.

Optimistic scientists have long hoped to split an atom, some contending that when this feat was accomplished a boundless source of energy would be available. There have been extremists who feared the accomplishment would mean the hurling of the world to destruction.

"It is difficult to say what this discovery may lead," Lord Rutherford said. "Up to the present the experiments have not yielded anything which will be of immediate commercial value."

China Leading Customer

China is the leading customer for complete aircraft made in the United States. In both 1930 and 1931 China held the lead over all other countries. The Chinese like American machines because their territory bears a remarkable similarity in flying conditions to those in the United States.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Extirminator.

Too Bad For the Wife

A farmer appeared the other day at a theatre that is accepting two dozen eggs as the price of admission. He handed a paper sack to the ticket-taker.

"There's a couple of dozen eggs, mister," he said. "I want to see your show. I'd have brought the misuses with me if the hens had shelled out a little better."

China, the most populous nation in the world, had 479,821,000 inhabitants in 1930. That country has 110.4 persons for each square mile of land area.

Danger In Worn Tires

If Used At All Should Be On Rear Wheels

It has been pretty definitely established that the rear right tire is the first to wear out, the rear left next, the front right next, and the front left last of all.

As a result, practice has become almost general to shift the worn-out rear tires to the front wheels with the idea of evening up the wear.

This, however, is dangerous. When a worn tire blows out on a rear wheel while the car is travelling at a high rate of speed, the driver still has enough control of the front wheels to guide the car safely out of a dangerous skid.

When, however, a front tire lets go, and the car is moving fast, there is almost nothing the driver can do. The steering is thrown out of his control, the car is forced into a serious skid and there are great possibilities of injuries to all in the car.

Rather have a worn tire on a rear wheel, even though it will wear down so much faster, than risk it to the front. For greater safety, however, a tire that shows the first mark of a tread worn down to the fabric should be taken off and used only as a spare.

Even as a spare, it should be in use only long enough to get a good replacement.

Suffering in silence is more fun if you explain what you're doing so nobody will miss it.

Large shipments of construction materials continue to arrive in Manchuria.

W. N. U. 1941

Some Of The Advantages As Well As Disadvantages In Growing Of Reward Wheat

(By H. G. L. Strange)

As the wheat fields in Western Canada began to extend northward the need was felt for a wheat variety that would mature earlier than Marquis, so as to avoid damage from early fall frosts. Several new varieties had been produced by plant breeders to fill this purpose, notably the Red Bobs selections, originated by Dr. Seager Wheeler, Supreme, Early Triumph and Red Bobs 222, the latter having been re-selected by the University of Alberta, also the varieties Garnet and Reward produced by the Dominion Experimental Farms, Ottawa.

Because of its high yield Garnet wheat quickly became popular and in the last few years has increased by leaps and bounds in Northern Alberta and Northern Saskatchewan. Some concern, however, has been felt that because the milling qualities of Garnet are somewhat different to those of Marquis, and because Garnet flour has a slightly yellowish tinge, that the quality and reputation of Canadian wheat on the world's markets might be harmed if too large an amount of Garnet should be grown.

Because of this concern some have recommended that some of the other earlier varieties might be better. Reward wheat is one that is widely recommended.

Reward was originated at the Dominion Experimental Farm, Ottawa, and is the result of a cross between Marquis and Prelude made by Dr. Charles Saunders in 1912. Under the direction of Mr. L. H. Newman, the present Dominion Cerealist, the variety was tested for several years by several hundred co-operators in different parts of the west. Finally the variety was released by the Minister of Agriculture for further trials by farmers in 1923.

Reward wheat has this year been accepted for registration by the Canadian Seed Growers' Association, which means that the scientific plant breeders of Canadian Institutions consider that the variety is of good economic value and is well suited for use in Western Canada. There can, therefore, be no need for hesitation in the use of this variety by any farmers who find that their districts and farms are suited to Reward wheat. The Dominion Cerealist has now standardized the variety and the seed of Reward, true to variety and sealed in the sack, will undoubtedly be available to farmers in the near future.

The official description of Reward wheat is as follows: Time of maturity 5 to 8 days earlier than Marquis—height of plant 3 to 4 inches shorter than Marquis on the average—strength of stem a little stronger than Marquis—awns absent except for a few short apical awns, usually irregular in length, glumes covering, slightly to heavily pubescent (or hairy), depending on season and locality, grain color red, usually darker than Marquis, grain texture hard, rarely plebeal or starchy.

The head of Reward is generally shorter and more lax than Marquis while the spikelets are usually more or less irregularly arranged, giving the head a characteristic ragged or spiral appearance. As previously stated the glumes are pubescent or covered with short hairs which can usually easily be seen with the naked eye, magnifying glass. This is one of the always with a magnifying glass. This is one of the characters that help in identifying the variety.

The milling and baking values of Reward wheat are excellent. It gives a high yield of flour. It bakes into bread, giving a large well piled loaf of excellent color and texture. The berry is uniformly plump, of a clear red color, seldom being plebeal or starchy. This is the reason this variety will often bring No. 1 Hard and No. 1 Northern in the Northern districts where Marquis and some other

sorts seldom obtain better than a No. 3 grade.

The straw is shorter and stiffer than in either Marquis or Garnet, and in wet years Reward will often stand up where some other varieties, particularly Garnet, go down. The chaff is light on the kernel, which enables it to stand a considerable amount of moisture in the fall without sprouting in the stock, such as often happens with other sorts, particularly with Marquis.

It is from 5 to 8 days earlier than Marquis, or about as early as Garnet in most places, although in other places it is 2 or 3 days later than Garnet, but it is always earlier than Marquis.

Weights very high to the bushel. Usually two or three pounds more than Marquis, Garnet or other sorts. Weights of 65 and 66 pounds to the bushel are quite common with Reward wheat. Reward is probably the best of all varieties of Hard Red Spring Wheat for Exhibition purposes. Its high weight per bushel, bright, plump and pleasing berry of good lustre usually win it a high place in competition with other varieties.

Reward wheat is not a rust resistant wheat, but because of its earliness in rust years often suffers less damage from rust than many of the other varieties. Investigations show that Reward wheat does not shatter as much as some of the other varieties, particularly Garnet.

On rolling land wheat on the high ridges usually ripens before that in the low spots. Reward will stand on these high places until after ripening for a considerable time without the berry shrinking or discoloring, thus the whole field can be allowed to ripen thoroughly before cutting; therefore the sample should be of an even color and plumpness even from such rolling land. Its stiff straw, early maturity, non-shattering head and ability to stand after ripening without much loss of plumpness, weight or color, makes Reward wheat an excellent variety to use for Combine Harvesting.

The most defect of Reward wheat at the present moment seems to be that on the whole the yield is lower than either Marquis or Garnet, but in some districts farmers state the yield of Reward is higher than Marquis or Garnet, and in many districts where most farmers report lower yields of Reward there are often one or two farmers who report higher yields. In most cases those who report high yields of Reward have seed from a peck to half a bushel more than is usual with Marquis or Garnet. Every case investigated where the farmer seed two bushels of Reward to the acre reported as giving a satisfactory yield.

An Old Advertisement

Egyptian In Third Century Wise In Business Matters

A cleverly written advertising sign, the idea of an enterprising business man in Egypt in the third century B.C., has been discovered by Dr. Reich, of Dropsie College. The advertisement, written on a small stone, has been deciphered as follows:

"Dreams I explain, holding the commands of the God-Good fortune! A Crete will interpret them."

This old advertisement was found by Dr. Reich as he examined a number of inscriptions from the Temple of Serapis, near Memphis. The dream interpreter's sign had been strategically set up before the Avenue of Sphinxes, which led to the temple. Along this avenue passed Egyptians who came from near and far to spend a few days on the temple grounds. They came in order to sleep there and to have their dreams interpreted by the priests, who were the official and paid dream-interpreters. The stranger from Crete was therefore distinguishing himself into the dream business against formidable competition of the priests.—Toronto Telegram.

No less than one out of every ten gallons of gasoline is wasted through failure of motorists to replace worn-out spark plugs, according to tests conducted by the University of Pittsburgh.

"I met your husband yesterday, but he didn't see me."
"I know. He told me."

Economic improvement in French Indo-China shows increasing momentum.

Havana, Cuba, has a population of over 600,000.

A LIKABLE LITTLE MORNING
TROCK, FRESH LOOKING
AND COOL

Don't you love it! It is a dress you can don when you are "doing things" and feel just right in it. It has no fussy bits and ends to get in the way of your gardening, making the house attractive, etc.

One's mind naturally runs to thoughts of dimity prints, basette prints, etc., for such a dress. But there are other materials such as dotted piques, striped or plain linen, cotton mesh, tub silk, etc., which could enter the running, too. For this model, a blue and white dimity print with blue bias bands was chosen.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Just An Old English Custom

A. R. Garner may be truly said to carry his responsibilities lightly as he observes an old English custom and carries his bride, the former Miss Marjorie Pretwell, through the door of St. Cuthbert's Church, Yorkshire, after the ceremony.

Recent Discovery

Interests Astronomers

May Be Asteroid Nearer To Earth Than Any Yet Found

Astronomers at Mount Wilson Observatory and others in this country and Europe are keeping a close watch on Delport's "object," an asteroid or comet discovered recently by an astronomer at the University of Brussels.

"Our observations of it have disclosed no tail and seemingly only reflected light," said Dr. Frederick H. Sears, indicating that it is an asteroid and one much closer to the earth than any yet found.

He is assistant director of the local observatory, a branch of the Carnegie Institution of Washington.

"Discovery of an asteroid nearer the earth," Dr. Sears said, "would enable us to obtain a more accurate value of the distance from the earth to the sun, upon which the measurement of distances to all heavenly bodies is based."

"We are much in the position of a surveyor computing the width of a river by shooting at a given point across the stream from two different points on its side of it, and determining the angles of the imaginary triangle. The narrower the stream the more accurate his measurement will be."

"Our computation of 93,000,000 miles as the distance of the sun from the earth is based on the estimate of 13,000,000 miles as the distance from the earth to Eros, the nearest asteroid yet found."

Prices May Be Better

Possibility Of Advance In Wheat Predicted By U.S. Official

A "strong possibility" of better wheat prices are seen by George S. Milnor, president and general manager of the Grain Stabilization Corporation. In a statement Milnor said:

"While in Europe I visited France, Italy, Germany, Belgium and England, and also met our foreign representatives from other countries. Europe will receive rather heavy imports of wheat between now and the harvesting of their new crop. Russia has practically completed the shipment of her wheat surplus from the last crop and the supplies from that source will be negligible until after harvest, therefore, Europe must look principally to Canada, the United States and Argentina for their supplies."

Empire Reforestation

B. O. Douglas Fir Now Grown Extensively In England

During the eleven years ending in September, 1930, the Forestry Commissioners of Great Britain planted a total of 32,330,000 Douglas fir trees on various sites in England, Wales and Scotland. All these trees were raised from seed furnished by the Forest Service, Department of the Interior, through their seed-extension plant at New Westminster, British Columbia. A considerable quantity of seed of other western species was furnished to the Commissioners from the same source. The New Zealand Government also took a large quantity of tree seed.

Russia announces the successful production of rubber from a plant named "towsagia."

Great Britain And United States Unite In Opposing Abolition Of The Larger Naval Vessels

Rainy Lake Map Sheet

Lake Country East Of Winnipeg Is A Paradise For Canoeists

Very informative and interesting is the Rainy Lake Map Sheet of the National Topographic series, recently published by the Topographical Survey, Department of the Interior, Ottawa.

The map covers the country along the international boundary from Quebec, Ontario Provincial Park on the east to within thirty-three miles of the town of Rainy River on the west. In addition to agricultural, mineral, forest and water power resources embraced in the area, it is known as a great hunting and fishing region. The Port Arthur, Rainy River and Winnipeg lines of the Canadian National Railways runs through the district from east to west, picking its way through the maze of lakes and rivers, which were the means of transportation from the time of the opening up of Western Canada until the railway came, about the beginning of the present century. The lakes and broken country are a paradise for the canoeist, the fisherman, and the hunter, and the waterways are so intricate that the voyagers and trappers of the fur companies from the time of La Verendrye onward were always searching for shorter routes for the carriage of their furs and trade goods.

The chief centre of population is Port Francis, named after Lady Simpson, the wife of Sir George Simpson, one of the famous governors of the Hudson's Bay Company. Port Francis is situated on Rainy River a few miles below the point where it emerges from Rainy Lake. Near it are shown the water powers with which its name is associated. On the south side of the river in United States is the town of International Falls. The agricultural areas are chiefly in the western portion, extending from Port Francis to the townships indicated on the extreme western edge of the map.

The railways and highways in United States which bring travellers and tourists into this part of Canada are also shown. The map which is more complete in all topographic detail of this district than any previous issued, may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.

Canada's Dairy Industry

Is In Critical Condition Opinion Of Conference Held In Ottawa

The dairy industry throughout Canada is in a critical condition. That was the conclusion reached at a conference held in Ottawa on April 11 and 12. Delegates were present from most of the provinces and the gathering was said to be thoroughly representative of the whole industry. It was declared unanimously that the situation has been brought about first, by failure to keep abreast of the world in methods of milk production and, secondly, by world-wide competition and prevailing economic conditions. The remedy for the ones lies to a large extent in our own hands but the cure for the second is not so easily come at.

One of the remedies suggested was to pay a bonus upon all butter exported from Canada through a levy upon the production of butter in Canada. This policy has been followed with success by Australia and South Africa and it was strongly urged by the delegates from Western Canada and some of those from the east. The conference was unable to reach a unanimous decision on the proposal. It was called at the request of Hon. Robert Weir, Minister of Agriculture, and Hon. H. H. Stevens, Minister of Trade and Commerce. Among the recommendations made was the following: "That your Government announce that an emergency has arisen in the dairy industry of Canada and take steps to launch at the earliest possible moment, a nation-wide campaign to increase the efficiency of the dairy industry, through an educational campaign designed to lay the facts of the situation before all interested in the industry."

Canada has for years had nine departments of agriculture in as many different provinces, in addition to numerous agricultural colleges and courses. It seems strange if their united efforts have produced as little effect upon the dairy industry as the conference at Ottawa has indicated.

Another thing that doesn't turn out as you wish is the auto ahead of you.

Great Britain and the United States fought for their battleships at the Arms Conference at Geneva, forming a defensive alliance against an organized offensive of the small powers who wish to classify all ships over 10,000 tons as aggressive.

The small powers would abolish battleships or internationalize them within the League.

The United States and Britain received moderate support from Japan and lukewarm encouragement from France.

Senator Claude A. Swanson, of Virginia, announced at the meeting of the naval commission that the United States unequivocally opposed classifying battleships as offensive weapons. They are the backbone of the United States defense system, he said, and "a threat to no nation," since we covet no one's territory. He stressed the United States obligation to keep the Panama Canal open in peace and war and to defend its Far Eastern possessions.

Speaking and gesturing in a senatorial manner, he continued:

"If we had completed our naval programme after the war, it is conceded we would have been supreme on the seas, but we agreed to be a threat to no nation. . . . the battleship is cheaper and more effective for defensive purposes than to build fortifications along our coasts. Battleships have saved us a great and expensive army for defense purposes."

"We realize that naval power plus military power would menace every nation. . . . We only wish the people who have armies had gone as far as the naval people in reducing and limiting."

He declared cruisers to be of greater offensive use than battleships, particularly in preying on commerce and blockade.

Vice-Admiral A. D. P. Pound, of Great Britain, supported Swanson, declaring that general naval superiority, not capital ships, enables attacks on trade. Similarly, he continued, it is not fair to claim that battleships are destined for carrying out invasions.

"The capital ships of the world can now easily be numbered on the fingers of the two hands," he said. "They are more precious than rubies to the countries possessing them. No nation is going to risk them by pitting them against coastal fortifications."

Erson Von Rheinbaken, of Germany, announced that Germany is willing to sacrifice her powerful and efficient "pocket" battleships on the altar of disarmament if others scrap battleships over 10,000 tons. Defending the "pocket" ships as defensive rather than offensive, he said:

"Germany's 10,000-ton battleships cost one-half as much as your battleships. You would be saving money if you adopted Germany's restricted tonnage methods of construction."

He heatedly attacked the charges made by Charles Dumont, of France, that the "pocket" ships are offensive. He referred to the charges as a myth and introduced a technical demonstration of why the light ships were built speedy and heavily armed to defend Germany against the superior tonnage of foreign attackers.

He also criticized the United States thesis of the defensive nature of battleships, saying:

"What about the blockade of our ports, which was the decisive turning point of the World War?"

Cottage Has History

"The Lone Eagle," a small cottage owned by Admiral Guy H. Burrago, at Hopkinton, New Hampshire, was built in large from the crates in which Colonel Charles A. Lindbergh's New York-to-Paris plane "Spirit of St. Louis" was shipped back to America.

Spanish cedar is grown chiefly to make cigar boxes.

"Why is your husband in such a rage?"
"They are praising marriage over the wireless!"—Dorfbacher, Berlin.

"But the boat sails on the 13th of the month. Aren't you superstitious?"
"A little, but it's my wife who's sailing."—Buen Humor, Madrid.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective, for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—it is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

Castor Oil

Bacon and Ham Exports

Canada Is Now Recapturing Large Share Of British Market

That Canada is rapidly moving forward toward the recapturing of her share in the British market for bacon and ham is indicated by the statistics of export of these commodities to Great Britain for the first quarter of the present calendar year in the opinion of Hon. H. H. Stevens. During the three months the total exportation to Great Britain amounted to 56,480,000 lbs. as compared with 15,821,000 lbs. for the corresponding period last year or an increase of 40,659,000 lbs. The percentage of increase is therefore approximately 257 per cent.

"In addition, it is interesting to note," a statement issued by the Minister of Trade and Commerce, says, "that during the months of February and March, Canada exported direct for the first time to the Irish Free State 13,342,000 lbs. of bacon and ham. And the Irish Free State has in the past, been regarded (with Denmark), as a serious competitor with Canada in the British market for these particular products."

Total exports of bacon and ham to all countries, for the first quarter year amounted to 77,526,000 lbs. as compared with only 20,502,000 lbs. in the first three months of 1931, an increase of nearly 400 per cent.

To Great Britain alone during the first three months of 1932, Canada exported more bacon and ham than were exported during the entire 12 months of 1929.

During the latter year less than nine per cent. of Britain's imports of bacon were supplied from within the Empire and only 14 per cent. of the ham.

Efforts on the part of the department of trade and commerce, through exhibitions and publicity in Great Britain designed to popularize Canadian products, including bacon and ham, coupled with educational efforts on the part of the department of agriculture to show to the farmer that standard of quality and continuity of supply are prime requisites in securing and retaining the British market, are regarded by the minister as being largely responsible for the increase in the British demand for Canadian hog products.

"The measure of success that has been achieved through advertised quality, says the minister, is apparently now being achieved in the production field."

Low Ocean Fares

Britain Preparing For Greater Invasion Of Tourists From Canada Than Ever Before

Britain is preparing for a greater invasion of tourists from Canada and the United States than ever before, this season. This is due to more determined efforts on the part of the Travel Association of Great Britain and Ireland, who have highly organized their resources for welcoming visitors to the Old Land.

Recent ocean rate reductions to the extent of 20 per cent. have now made it possible to spend a summer holiday by going to Europe, doing whatever sight-seeing one likes, and returning to this country for an all-inclusive charge of less than seven dollars a day, according to the Cunard and Anchor-Donaldson lines.

These tours in Europe include the best sight-seeing in the time available, chiefly by motor coach, as well as by rail and steamer. These tours also include visits to the Continent, in France and Belgium especially.

"Modern Third Class" is used for the ocean crossing and to many people whose memories of Third Class date back to many years ago when they first came to Canada, this class offers surprising comfort. Nowadays, in fact, third class is more comfortable than first class was thirty or forty years ago.

Ontario and Quebec provinces expect to reap some benefit from the mass of tourists who pass through Montreal on their way to Europe, as many western Canada and United States visitors spend some time seeing Ontario, Toronto and Montreal en route.

Aeroplane Patrol

Royal Canadian Mounted Police Will Use "Phines On Both East and West Coasts

Aeroplane is to be used by the Royal Canadian Mounted Police for preventive work on both Atlantic and Pacific coasts. Major-General J. H. MacBrien, commissioner of the R.C.M.P., announced that arrangements had been made to employ a considerable number of "planes of the Royal Canadian Air Force.

The aircraft will operate in conjunction with vessels of the preventive service, and will be stationed at strategic points on both coasts.

The forests of Quebec cover an area of more than 155,000,000 acres according to recent estimates.

Fashion

IN THIS PRETTY DRESS, DIFFERENCE IS ATTRIBUTED TO USING A PLAIN AND PRINTED FABRIC

Many girls love to have free and easy to wear clothes with skirts to swing about.

For those who look best with the fullness falling from the yoke, the narrow waist may be omitted. It's a darling dress. The yoke and applied band at the hem are nautical blue plain batiste. The dress itself is white batiste all covered in blue spots.

It's such a cunning scheme, and youngsters love it. Dainty prints, voile prints, gingham checks, candy striped cotton broadcloths and pique are also suitable.

Style No. 430 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 35-inch figured with 3/4 yard of 35-inch plain material and 1 1/4 yards of binding.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Bidding For Tourist Trade

Canada Has Competition From Other Countries and Should Advertise

The French, Germans, Cubans, Italians, Swiss and a dozen other people are actively engaged in competing for the American tourist trade. This year steamship fares have been reduced to so low a level that Canada must face competition from tourist resorts across the Atlantic. Then why not make a virtue of the Atlantic shipping fares, and attract more tourists to Canada from Europe this summer? Canada needs the tourists, our shipping companies need the passengers.

What Is Fume

What is fume? Upon the walls of the corridor leading to the Parliamentary restaurant at Ottawa, there are etchings of all the Prime Ministers of Great Britain. The other day, when two American visitors were walking down this corridor, one of them stopped, pointed his cane at the etching of Disraeli, and knowingly remarked: "Ah, George Arliss."

Tree Planting Car

Canadian Forestry Association Carrying On Good Work In The West

The Tree Planting Car of the Canadian Forestry Association which will commence its fourteenth year of spreading the gospel of tree planting on the prairies left Montreal after a thorough overhauling in the Canadian Pacific Railway shops at that point, on April 28 for Ottawa. At Ottawa it will be equipped, and then sent west to Regina, where Alan B. Heaven will take charge. The season of lectures on tree planting will open this year.

Mr. Heaven, who has been seven years with the forestry car, has prepared a real entertaining programme for the farmers, their wives, and children who attend, and is hoping that a new record in the number visiting the car will be established.

With drought conditions in the southern prairies during the past three years, the publicity that has been given the necessity of planting shelter belts and windbreaks, and the belief expressed that trees can and will play an important part, farmers have come to look on the problem of a treeless plain as one needing immediate action. They have learned from the experience of neighbors that mixed farming and tree planting on the prairies go hand in hand, and so efforts have been successful this year in bringing the gospel of tree planting to the people of the province.

The first two months of the tour will be spent in Saskatchewan, and later in the summer the car will travel through Alberta.

Recipes For This Week

(By Betty Barclay)

COFFEE GINGER COOKIES

1 cup strong, hot coffee.
1 cup molasses.
1/2 cup brown sugar.
1 cup shortening.
1 tablespoon boiling water.
1 tablespoon ginger.
1 tablespoon cinnamon.
Flour for mixing.
1 teaspoon soda.

Dissolve soda in boiling water and stir into molasses. Pour over the coffee, and mix thoroughly. Roll until dough is stiff enough to roll. Roll and cut into desired shapes.

ORANGE CANDIED SWEET POTATOES

(Serves 6)
1 cup orange juice.
1/2 teaspoon sugar.
1/2 cup water.
1/2 cup sugar.
8 tablespoons light corn syrup.
1/2 teaspoon salt.
1/2 cup butter.
6-8 sweet potatoes or yams.

Combine first seven ingredients and pour over peeled uncooked sweet potatoes arranged in casserole or baking dish. Bake covered in a moderate oven (375 to 400 degrees Fahrenheit) until tender, 30 to 40 minutes. Baste occasionally. Remove lid last 10 minutes to brown or put under broiler.

VARIATION: Just before removing from oven, add a layer of marshmallows and brown.

Scientist Honored

Director Of Geological Survey Elected As Member Of American Philosophical Society

Election of Dr. W. Collins, director of the geological survey, Department of Mines, Ottawa, to the American Philosophical Society, oldest scientific society in the western hemisphere, was announced at Ottawa. As membership is restricted to outstanding scholars and statesmen who have distinguished themselves by their contributions to the realm of useful knowledge, the honor conferred on Dr. Collins is regarded as a particularly enviable one.

Dr. Collins has had a brilliant career as a geologist. In 1929 he represented the Dominion Government at the International Geological Congress held in South Africa.

A Missouri expert prefers a cow to a saxophone, because in addition to making the same noise the cow gives milk.

SUNDAY SCHOOL LESSON

MAY 15

JACOB AT BETHEL

Golden Text: "I am with thee and will keep thee whithersoever thou goest."—Genesis 28:15.
Lesson: Genesis 27:28.
Devotional Reading: Psalm 130:1-2.

Explanations and Comments

Jacob's Dream, verses 10-15.—Jacob was fleeing from Esau's wrath; he was going toward Haran when, quite by accident it would seem from the expression "He lighted upon a certain place," he came to the hillside near Bethel and there in a dream he had his vision of God.

God pity the boy who leaves home and does not carry with him some kind of pointing finger that shows the way to God's home. Memories, some imaginations, that lead him to the place where God may be seen.—Ralph Connor.

Needling something for a pillow he could find nothing better at hand than one of the stones on the hillside. When Bishop Taylor returned to this country he had no use for soft pillows and more than once substituted a headrest of books.

His vision of God in the sky as Jacob approached Bethel, and his last sight before falling asleep had been of the sun and moon, of limestone rock in strata that rise one above the other. He dreamed, and naturally dreamed of a flight of stone steps, or ladder, reaching to heaven. The ladder symbolized the thought that there is communication between heaven and earth, between God and man.

"The Spirit of God always conveys His teaching to his servants in language borrowed from their surroundings." John's Revelation is full of reminiscences of the Aegaeon, which sometimes murmured around the cliffs of his prison like a sea of glass bathed in fire, and at other times broke on them in yeasty foam. David's Psalms make constant reference to the wild hill country of Judea in which so many of them were composed.—B. P. Meyer.

It is melancholy to hear of Bethel in the dim, far past if we are to conclude that that ladder between the soul and God has been pulled up, or pulled down. But that direct divine intercourse has ceased.—Rufus M. Jones.

Heaven is not far from the earth. Even in the bleak and barren stretches of our life, when we feel lonely and desolate, there may come to us experiences which cheer and assure us that they seem like very angels from above, and which carry us up from the depths of our desolation to the very gates of heaven.—J. E. McFadyen.

On Jacob's dream ladder the angels of God were ascending and descending, symbolizing the thought that there is communication between God and man. Before this Jacob knew that God is now he learned that God was accessible. When he was living at home, where his life was made comfortable by the favoritism of Rebekah, his mother, there was no room in his mind for a revelation from God. When alone on the rocky hillside, with no one to help him, he found him susceptible to divine influence. Providence often thus prepares the way for revelation.

And then in Jacob's dream Jehovah appeared beside him and spoke words of encouragement and hope. Just as the stony landscape where he was lying was woven into his dream, so were the words of his father Isaac in that, partly learned that "God Almighty be with thee," and give the blessing of Abraham. . . . that thou mayest inherit the land of thy sojournings, which God gave unto Abraham," verses 3, 4. He heard God promise that he should inherit the land, and his descendants should be "as the dust of the earth" in number, and in him and in them "all the families of the earth should be blessed."

And then God added the assurance of His companionship and guidance: "And behold I am with thee and will keep thee whithersoever thou goest." "The God of Bethel" has become a phrase for God's ever-watchful care.

Do we think of God as the Comrade of our way, as with us in all our experiences of life? Has the thought of the nearness of the presence of God been a working power in our lives? In peace will both lay me down and sleep; for Thou, Jehovah, alone makest me to dwell in safety, Psalm 4:8.

Probably Correct

Theological Lecturer: "Yes, my friends, some admire Moses, who instituted the Old Law; some Paul, who spread the New. But, after all, which character in the Bible has had the longest following?"

Voice from Rear: "Annas."

Willing To Make Deal

She (concluding the quarrel, haughtily): I suppose you would like my ring back?
He (politely): I would rather—unless you can find somebody quickly to take over the remaining instalments.

Certain Is Right

Friend: Say, there's a bunch of people outside waiting to be presented to you. Among them is a bishop who says he married you some time ago. Film Actress: Gee! I'm practically certain I never married a bishop.

So large is the collection of cups and trophies owned by the late Sir Thomas Lipton that it will require two months to prepare them for exhibition at the Art Galleries at Kelvingrove, Scotland.

"DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

RALPH GRAVES
Scenario Writer

"Here in Hollywood," Ralph Graves, scenario writer, says, "women don't use birth-days as an excuse for growing old. They seem to know the secret of becoming more and more alluring year after year."

"The screen and stage stars usually keep that lovely irresistible glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret."

"Above all, guard complexion beauty," the stars will advise you. "Use gentle, soothing Lux Toilet Soap regularly as we do!"

Attresses the world over use fragrant, delicately white Lux Toilet Soap to keep their complexions always exquisite. In Hollywood, where 666 of the 694 important actresses are devoted to it, this fine soap is official in all the great film studios.

You are sure to love the way it cares for your skin! The excess of dollar-a-cake French soap for just 10c!

Flood Sufferers In China Are Starving

Matter Brought Before League Of Nations Manchurian Commission

News of how 6,000,000 Chinese flood sufferers in the Hwai, River Valley north of Anhwei are existing chiefly on grass and bark, while some are being sold in a human market, was brought to the attention of the League of Nations' Manchurian Commission at Peking.

The affected area was estimated at twice the size of New York State. The chief supply of food has been relief wheat from the United States. But owing to the trouble at Shanghai between the Chinese and Japanese and inconvenient transportation conditions only 4,000 tons of wheat thus far have reached the Hwai Valley, said Shaowu Peter Chuan, superintendent of the National Flood Relief Commission for the North Anhwei area.

It will be late in June before the wheat crop will have matured and the problem is to feed the starving millions, while the authorities do everything possible to improve transportation. Meanwhile, the refugees have been eating grass, weeds, sprouts and the bark of trees.

Relief workers reported to Chuan that the market price for the sale of humans is \$1 in Chinese money, or about twenty cents in American, for each year of the person's age. A ten-year-old child sells for \$10 or about \$2 in gold, the rate rising \$1 a year until the age of 25, when the price begins to recede.

Soap Used Without Water

A waterless soap has been developed by a chemist attached to a joint concern in Kansas City. The soap, in the form of a paste, is said to be harmless to the skin and even possesses healing and antiseptic qualities. It lathers freely without water and absorbs all dirt.

How Earth Is Divided

Scientists estimate that 40 per cent. of the land area of the earth is desert, 30 per cent. is productive, and 30 per cent. is poor grazing land, forest, high mountains and waste. There is no agreement as to the exact portion that is inhabitable.

Argentina has only about 7,000 plants using steam for power.

Porto Rico imported \$1,000,000 worth of jute bags in 1931.

TABLE REPORT ON CLOSING OF MANITOBA BANK

Winnipeg, Man.—A majority report of a special legislative committee, tabled in the Manitoba House, said it would not have been necessary to close the Manitoba Provincial Savings Office if the Dominion Government had given the necessary guarantees, sought by Premier John Bracken.

The committee was appointed to inquire into circumstances surrounding the office's closing by the Manitoba Government in March. Accounts of the office were taken over by the chartered banks.

Two Conservative members of the legislature, one Manitoba member of parliament, and three prominent Winnipeg men are named in the report as persons who started the rumors, causing a run on the government-owned office which eventually led to its closing.

They are Erick Willis, Conservative member of parliament for Souris; John T. Haig and P. Y. Newton, Conservative members of the legislature; Valmore Schweitzer, provincial organizer for the Conservative party; Dr. L. B. Wilmot and Dr. C. Rice.

The Dominion would not have assumed any greater responsibility in guaranteeing deposits in the Savings Office than it did when it guaranteed the banks, the report sets out.

Refusal of the Dominion to grant these guarantees at the request of the province, the report declares, "cannot be justified in view of the guarantee given later by it to the banks, and in view of the assistance given to other provinces."

The committee found that the business of the Savings Office was normal up until about January 11, 1932, when "unusual withdrawals of deposits commenced as a result of rumors." The run on the office was attributed by the committee directly to "rumors" that the office was unsound.

"They were in part," states the report, "the result of a deliberate and organized campaign."

The report was signed by the five government members of the committee appointed to inquire into closing of the office, and S. J. Farmer, Laborite; Sanford Evans and J. O. McLaughlin, Conservative members, are expected to table a minority report.

Government Control Of Radium Considered

Information Given To Senate By Hon. Arthur Meighen

Ottawa, Ont.—Government control of radium production and conservation is having the "immediate and earnest" consideration of the government, Right Hon. Arthur Meighen, leader of the Senate, told the body. The danger of a mining rush into the Great Bear Lake district of Canada's North West Territories, a thousand miles north of civilization, with the possibility of winter over-taking the men before they could get out, was feared by Senator Meighen. He urged the government to take such measures as will ensure no man going in who had not made proper provision for getting out.

Receive Flower Seeds

Toronto, Ont.—Flowers will bloom again in drought-stricken western Canada. A letter received by W. L. Aiken, Toronto, originator of the idea of despatching flower seeds to western Canadians, expressed gratitude for the thoughtfulness of Ontario people. The letter was signed by C. B. Daniel, general manager of the Saskatchewan Relief Commission.

U.S. Taxes All Cheques

Washington, D.C.—A flat rate of four cents on the sale of each \$100 bond was voted by the United States senate finance committee. The rate was the same as set for stock sales. The committee made all cheques subject to the two cents tax, eliminating the \$5 exemption allowed in its original proposal.

Great Britain To Reply

London, England.—Sir John Simon, Secretary for Foreign Affairs, told parliament that Great Britain expects to reply soon to the United States note proposing that debt payments suspended under the Hoover moratorium should be made in annual installments.

Thin concrete roofs of large spans can now be built with no intermediate supports, as a result of a new system of reinforced concrete construction.

W. N. T. 1641

Adventurous Cruise

Small Vessel To Sail For Southern Seas In Search Of Treasure

Toronto, Ont.—Bound south, the 60-foot auxiliary schooner "Wanderer" will dip her flag in farewell to Lunenburg, N.S., in a few weeks on an adventurous cruise. Shipped by Lieut.-Commander Geoffrey Coysh, of Toronto, the little vessel will follow a long itinerary. The only woman in the crew is Mrs. Coysh, while Frank Everett, her brother, and Murdock Kirby are the other principals in what is hoped to be a search for treasure. The party is to search for treasure in Coos Bay Island and collect data on the Hakhaldo—the mysterious race said to inhabit Easter Island. Everywhere they visit, photographs are to be taken, and when the ultimate destination, Singapore, is reached, the party hopes to have one of the most valuable photographic collections of South Sea information in existence.

Assistance Will Be Given

Dominion To Stand Behind Provinces In Relief Matters

Ottawa, Ont.—The Dominion will contribute and where necessary loan also to the provinces, in the matter of direct relief; a percentage of relief costs yet to be determined will be paid to the provinces; and if a province is unable at the moment to pay its share, the Dominion exchequer will loan this amount taking in security treasury bills.

This position of the Dominion Government was made clear in the House of Commons by Hon. W. A. Gordon, Minister of Labor, during consideration of the unemployment relief resolution. The minister was answering a request for the attitude of the Administration from Rt. Hon. Mackenzie King, opposition leader, and Hon. Ernest Lapointe (Lb., Quebec East).

Amazing Spirit Manifested

No Evidence Of Complaining On Part Of Business Men And Farmers

Vancouver, B.C.—Impressed with "the amazing spirit of optimism and hope" on the Canadian prairies, Hon. H. Stevens, Minister of Trade and Commerce, reached Vancouver for convocation of the University of British Columbia.

There is no evidence of whining or complaining on the part of business men and farmers in the prairie provinces," he said. "Crop prospects are good and when harvest comes there should be a wide demand for labor. It is noticeable that there is a return to the old horse power, replacing machine power on the land."

Dawson Ice Breaks Early

Woman Was Winner Of Annual Prize For Guessing Date

Dawson, Y.T.—The ice in Yukon River moved out in front of Dawson on May 1 at 7:32 p.m., Y.T., thus deciding Dawson's annual ice sweep-stake to which guesses this year were confined solely to Dawson City and the immediate vicinity.

Total pool was \$1,200, given as one prize and won by Mrs. Negan of Gold Bottom Creek, with a guess of May 2, 7:37 p.m.

This is one of the earliest breakings of the ice at Dawson in the memory of the white men.

Editor Arrested

Finnish Newspaper Man Of Sudbury Whisked Away Under Police Guard

Sudbury, Ont.—Arvo Vaara, editor of the Finnish daily "Vapaus" and Martin Parker, translator, arrested in a Royal Canadian Mounted Police raid on the newspaper's offices, were loaded into an automobile and rushed out of town in a southerly direction. Five plain clothes detectives guarded them.

Mounted police refused to divulge the destination of the car bearing their prisoners and declined to discuss the case.

Naval Appointments

Ottawa, Ont.—The appointment of Commander V. C. Brodeur as commander-in-charge at Esquimaut, B.C., effective from May 27, was announced by the Department of National Defence. It was also announced that Commander G. C. Jones would take command of H.M.C.S. Skeena, and the western division on May 25.

Death Toll Heavy

Jolo, Philippine Islands.—Belated reports brought the number of persons killed on the island of Sulu by the recent typhoon to at least 65. It is feared that many others are dead. The authorities estimated that 65,000 were rendered homeless.

Indians Getting Franchise

Many Being Recognized As Entitled To Full Citizenship

Ottawa, Ont.—The enfranchisement of Indians is proceeding with individuals receiving full citizenship by order-in-council as circumstances warrant. Hon. T. G. Murphy, superintendent-general of Indian Affairs, told Dr. Peter McGibbon (Cons., Muskoka), in the House of Commons. Dr. McGibbon said in his constituency were two bands of Indians, to whose intelligence and industry he paid high tribute. They wanted full citizenship, and Dr. McGibbon felt they ought to have it.

Churchill Insurance Rates

Effort To Be Made To Secure Lower Rates On Grain Shipments

Ottawa, Ont.—Every effort is being made to secure insurance rates that will encourage grain shippers to use the new terminal facilities at Churchill on Hudson Bay, Hon. C. H. Cahan, secretary of state, advised the House in answer to questions.

The Imperial shipping board in England secured a reduction in the rate in 1931, Mr. Cahan said, and there were hopes of further reductions in the near future.

GRAIN SHIPMENTS REPORTED FOR RUSSIAN POINTS

Vancouver, B.C.—The Vancouver Sun publishes the following:

"Coming to the most significant development in the Vancouver grain season, confirmation was secured of the sale of 1,500,000 bushels of grain for shipment to Russia from this port. Five vessels have been chartered to carry it to Vladivostok. The 'Castlemoor,' now loading here, is one. Names of the other four have not been disclosed."

"With Russia, three months ago regarded as the greatest menace to other wheat exporting countries, now back in world markets as a buyer, Vancouver grain men believed possibly 10,000,000 bushels of wheat would move through Vancouver to Siberia in the next few months. "The 40,000 tons of grain going out on these five ships to a consuming channel undreamed of six weeks ago are generally understood to be supplies for Russian troops assembled in Siberia since the Manchurian border trouble with Japan."

"Not a great deal is known about the shipments since most of the wheat was negotiated in London. "The London office of Kerr, Nifford and Company arranged four of the cargoes, it is understood. "Two of the ships to carry the wheat were fixed in London, and the other three are stated to have been secured through the Canadian Transport Company of Vancouver."

"While the requirements of the Russian military forces in Siberia are considered the chief cause of the Canadian orders, the underlying reason for the shipments is believed to be new famine conditions in the Volga section of Russia."

Germany's Rebuilt Navy

Here are two of the first pictures to be made of the new German navy built to replace the Imperial Navy which was scuttled at Scapa Flow, Scotland, after surrender to the British. Sailors of the cruiser Koenigsberg are shown at anti-aircraft gunnery practice, during recent manoeuvres in the Baltic Sea. Note that the men are equipped with the latest type gas masks. Inset shows some of the ships of the fleet in line.

BREAKS RECORD

C. W. A. Scott, British flier, who has just set a new record for the flight from England to Australia. Scott's time for the 13,187 miles was eight days, thirteen hours and 53 minutes.

Defendants Are Freed

One Hour Sentence Is Imposed In Connection With Massie Conviction

Honolulu.—Governor Lawrence M. Judd freed the four defendants of the famous Massie murder trial one hour after they had been sentenced to 10 years at hard labor at Oahu prison. Sentence was passed in a surprise move on Lieut. Thomas H. Massie, his mother-in-law, Mrs. Granville Fortescue, and the two seamen, E. J. Lord and Albert O. Jones.

Their hour of confinement was spent in the nominal custody of the sheriff at Iolani Palace, across the street from the judiciary building.

For several weeks they had been unsuccessfully for freedom on charges of slaying Joseph Kahahawai, asserted attacker of Mrs. Massie. Governor Judd, in commuting the sentence to one hour, merely said he was acting on a petition of the four defendants in which their counsel joined and was commuting the sentence to one hour.

Protests Against Use Of American Ports

Maritime Senator Thinks Route For Canadian Grain Should Be Changed

Toronto, Ont.—Senator W. H. Dennis, of Halifax, told an interviewer it was "difficult for the people of the Maritimes to find justification for shipment of millions of bushels of Canadian grain through United States Atlantic ports."

He said United States railwaymen and waterfront workers were being provided employment handling Canadian grain, while "the great Atlantic ports of Halifax and Saint John were idle as regards Canadian grain traffic."

Had Money In Bank

Hamilton, Ont.—Buried as a pauper recently, Obadiah Markle had \$14,000 in the bank. Markle died in a rooming house, and his landlady recently found a bank book bearing a record of deposits. Investigation proved the money was actually there.

Prepare For Conference

Alberta Arranging For Suggestions To Present To Imperial Parley

Edmonton, Alberta.—First steps toward preparing an Alberta statement for submission to the Imperial Conference in Ottawa next July are now being taken, it was announced by Premier Brownlee. As a preliminary step letters are being sent to organizations representing the economic interests in the province, in which they are invited to forward any suggestions they may have to offer.

It is expected that the Dominion Government will extend an invitation to the provinces to submit suggestions as to the position to be taken by Canadian interests at the conference.

The Alberta Government will also participate in a joint conference to which the Saskatchewan Government has invited its two neighboring provinces and which will be held about June 8. An exchange of views in preparation for the Ottawa conference will be the purpose of this interprovincial meeting, but Mr. Brownlee points out that it may not be found desirable to make a joint representation, inasmuch as the interests and resource of this province are much more varied than those of the other two provinces.

Curtail Waste Of Gas

Steps Are Taken To Cut Down Gas Production In Turner Valley

Calgary, Alberta.—Turner Valley gas conservation board, formed by the government to curtail the waste of gas in Turner Valley gas field, announced that orders would be issued immediately requiring oil companies to cut down gas production. The board aims to lower production to 200,000,000 cubic feet daily in an effort to prolong the life of the gas fields.

It is understood oil companies will be informed that they have 48 hours to reduce their gas yield to conform with the board's objective. It is expected gas production will be curtailed greatly and most of the waste gas flares at the Turner Valley Wells practically extinguished.

The board members have elected A. A. Carpenter, chairman. Other members of the board are John McLeish of the Department of Mines, Ottawa, and Dr. B. C. Wallace, president of the University of Alberta.

BILL IS DRAFTED TO DEAL WITH UNEMPLOYMENT

Ottawa, Ont.—The House of Commons took the first step to clothe the government with wide powers to combat unemployment. A bill was given first reading which would confer almost blanket power on the ministry until the end of the fiscal year next March. Debate on the resolution which prefaced the introduction of the bill was desultory.

Under the terms of the bill, which may meet more concerted opposition in its later stages, the government would possess power to negotiate agreements with the provinces, grant financial assistance to them and take steps "to protect the credit, and financial position of the Dominion or any province." Money might be loaned to public or private undertakings. One clause of the bill would enable the government to "assist in defraying the cost of the sale and distribution of the products of the field, farm, forest, sea, river and mines," and this has given rise to speculation concerning a bounty system on the products of some primary industries. The bill contained no limit on the money that might be expended by the Dominion.

The back-to-the-land movement, if encouraged by the government should not be confined to crown lands, said W. W. Kennedy, (Cons., Winnipeg South Centre). He knew of many good farms which had been returned to the municipalities for various reasons, and it was to these farms already partially cultivated and equipped that the movement should be directed.

Hon. W. R. Motherwell (Lib., Melville), said Saskatchewan had for many years, before the three successive crop failures in certain parts, produced more wheat than all the rest of the Dominion together. In connection with the five-cent bonus on wheat a request had been made to the government, he said, for an acreage bonus of \$1 per acre of seeded acreage. Later on, Mr. Motherwell suggested, the government might announce its attitude towards the request for an acreage bonus.

NUDE PARADERS GIVEN 3 YEAR TERMS IN JAIL

Nelson, B.C.—Sentences totalling 354 years were handed out by Magistrate John Cartmel to 84 Doukhobor men and 34 Doukhobor women, members of the Sons of Freedom sect, following their conviction in police court here of parading in the nude in public at Thrums. In each case a term of three years in the penitentiary was imposed. All admitted their guilt. The 118 accused were heard and sentenced in 120 minutes. The men and women were arrested after battling the police for 45 minutes.

Pete Maloff, leader of the element, took his sentence with a smile after admitting appearing in the nude, walked to his cell and with a smile said, "I thank you." There was little trouble with the men, but the women in some cases protested their sentences, declaring they had stripped but were praying or celebrating.

The convicted men will be sent to New Westminster penitentiary to serve their sentences, and the women to Kingston, Ont.

Hardly had Hon. R. H. Pooley, Attorney-General, who came here from Victoria to warn Doukhobors against further violations of the law in staging nude parades, concluded his ultimatum to the Sons of Freedom at Thrums, that they must obey the law or go to jail, when five or six women members of the sect disrobed and paraded defiantly before the attorney-general and his party. No arrests were made. Other women of the group demanded to be taken to jail to join their husbands, brothers and sisters. These were the only untoward incidents in the visit of Mr. Pooley to the district.

Passed Both Houses

Royal Assent Is Given To Number Of Bills

Ottawa, Ont.—Chief Justice Anglin, as Deputy to the Governor-General gave royal assent in the senate to a number of bills which had passed both houses. These bills include the following: To amend the patent act; to amend the petroleum and naphtha inspection act; respecting debts due to the crown; to amend the opium and narcotic drugs act, 1929; to amend the Yukon quartz mining act; respecting the Canadian Pacific Railway Company; to amend the destructive insect and pest act; to incorporate Lake of the Woods International Bridge Company.

Protest Telephone Tax

Ontario Independent Telephone Companies Interview Premier Henry

Toronto, Ont.—Representatives of Ontario independent telephone companies interviewed Premier Henry, to petition against payment by them of Dominion tax on long-distance telephone calls. The delegates argued that their companies were provincial companies operating under provincial charter, and therefore were not legally under the Dominion government tax law.

Premier Henry requested Hon. W. H. Price, Attorney-General, to submit a ruling in the case.

Honored By Canadian Press

Presentation Made To John Scott At Toronto Meeting

Toronto, Ont.—Members of the Canadian Press honored John Scott, managing director of the Toronto Mail and Empire, in recognition of his services as president of the National Co-Operative News Service from 1929 to 1931. During his presidency a system of automatic telegraph printers was introduced from coast to coast.

Mr. Scott was presented with a gold cigarette case by the president, M. E. Nichols, vice-president and managing director of the Winnipeg Tribune.

Will Not Modify Bill

Dublin, Irish Free State.—The Republican Government of the Irish Free State effectively put down two opposition amendments which would have modified its bill to abolish the oath of allegiance to the British crown as a requisite to tenure of public office.

Will Use Regular Service

London, England.—The British delegation to the Imperial Conference at Ottawa will travel by the normal passenger service across the Atlantic and not in a vessel of the Royal Navy. This was the reply in the House of Commons to a query by Thomas Griffiths, Labor member.

Fish In Hudson Bay

Pioneer Fishermen To Make Thorough Exploration Of Northern Waters This Season

Given aid by the Federal Government John Ingebrechtson, pioneer fisherman in Hudson Bay, will explore the fishing grounds of the Bay as far north as Ripples Bay, 150 miles north of Churchill.

There are salmon as well as salmon trout in the waters of Hudson Bay, believes Ingebrechtson, who with five fishermen sailing in the small vessel, the "Uto Svendrup," made an investigation of the waters of the west coast of the Bay north of Churchill last summer, and found fish in commercial quantities. The expedition found sufficient fish on their initial venture to pay the expenses of the summer, but they came away without any surplus to start this season's work.

Mr. Ingebrechtson claims that it is he can obtain a reliable outfit this year and his men will go as far north as Ripples Bay, which lies some 150 miles north of Chesterfield Inlet. The object is to get up as near the ice as possible as the fish are most plentiful in such regions, he claims. Further south and in the vicinity of Churchill, the abundance of whales and seals has a tendency to frighten the commercial fish, including salmon, cod fish and other species, away from the shore waters. Near the northern ice fields whales and seals are rarely seen in summer, he says.

Last summer the fishermen explored about 230 miles of the west coast line of the Bay. This year they plan to explore some 300 miles more, this to be in the northern field, where they believe there is more fish.

Colloid Symposium

Two Hundred Experts Will Attend Meeting In Ottawa

Two hundred experts in colloid chemistry—the chemistry of emulsions and such non-crystalline substances as wood, rubber, leather, resin, gelatin, wool and silk—are expected to be in Ottawa from June 16 to June 18.

In 1923 the American Chemical Society called the first colloid symposium. One has been held annually since that year. The fourth was held in Toronto in 1926; the tenth and second to be held in Canada is to assemble here in the New National Research Laboratories Building now being completed.

Dr. Emil Hatschek, who has been actively engaged in the study of colloids for the past 25 years, is the author of four books on the subject and lecturer on colloids at the Sir John Cass Technical Institute, London, England, has consented to give an address at the Ottawa meeting.

At least eight Canadians are to deliver papers.

Dr. G. S. Whitby, Director of the Division of Chemistry, National Research Laboratories, is head of the general committee in charge of arrangements for the meetings.

Export Handicapped

Canadian Products Sold To Lack Uniformity Of Quality

Hon. H. H. Stevens, Minister of Trade and Commerce, says the departments of representatives in Great Britain are handicapped in their efforts to maintain the flow of Canadian products in that country by lack of uniformity of quality and indifference regarding continuity of supply on the part of Canadian exporters. The complaints regarding lack of continuity of supply have been made in regard to a number of commodities, including cattle, bacon, eggs, butter and canned goods, while lack of uniformity of quality has been periodically alleged against certain others. These are shortcomings that should be overcome forthwith if Canada export trade is to thrive.—Toronto Mail and Empire.

Austria's twenty-third international sample technical fair will be held in Vienna in September.

"The ancient Romans were no hats."
"No, and they are all dead."—Il Travaso, Rome.

W. N. U. 1941

NOTES ON GARDENING

A Supply Of Flowers For Bouquets May Be Grown In The Vegetable Garden

To avoid marring the beauty of the regular flower garden by putting bouquets, supply of flowers should be grown in the vegetable patch for this purpose only. Here too are produced those flowers such as salpiglossis, scabiosa, sweet pea, and corn flowers which have beautiful blooms but poor foliage. Planted in rows with vegetables and receiving regular cultivation these are more easily looked after than when grown in the flower garden and, of course, they may be cut freely without disfiguring any border.

Building and Filling Window Boxes

Hanging pots and window boxes will add to the attractiveness of any home. Boxes can be purchased and stained green or any other color to blend with the surroundings, though arrangements will have to be made for supporting them. They should be placed in such a way so as not to obscure too much of the window when the plants are growing, and they must be very strongly supported by stout wire or chains as they will weigh very considerably when filled with earth. In building your own, use inch lumber and re-inforce corners with angle iron through which screw-nails are inserted. These can be purchased at any hardware store, and they are essential to prevent the box warping or bursting after the same has been watered a few times. The box should be at least eight inches wide and the same deep, so that there will be less chance of the soil drying out. It should be as long as the window-sill, but where the latter is over six feet, it may be advisable to use two boxes for convenience in handling. Window boxes and hanging pots should have holes in the bottom also a layer of cinders, broken pottery or gravel, to provide drainage. Then, if procurable, put in a four inch layer of well-rotted manure, and on top of this two or three inches of fine, rich garden soil. Press down firmly and after watering you are ready to plant. As the box or pot is very much exposed to the air, it will be necessary to water every day and even often during very hot weather. It is also usually best to add some chemical fertilizer dissolved in water, from time to time, to keep flowers constantly in bloom. At the back, put in geraniums, ferns, and ornamental grasses. In the middle, petunias, nasturtiums and other medium height flowers are advised. At the front, alyssum, ageratum and lobelia can be placed with one or two trailing plants such as German Ivy, Wandering Jew and climbing nasturtiums. The latter can be planted as seeds. Shade for a few days after box is filled until plants get thoroughly established.

Moslem Girl Becomes Pilot

Abandons Harem To Win Fame As Soviet Flyer

Less than five years ago Lella Mamed-Bekova, a Moslem girl in Baku, was wearing the horse-hair veil prescribed for wives, and living in the harem of an old-fashioned husband several times her age. Today Lella wears pilots' tops, flies an airplane and teaches at the aviation school. She is known throughout the Soviet Republic of Azerbaijan as the first woman flyer in that region.

Her life's story is being recounted in the journals of this country as an example of the strides being made by Eastern women. Their transition from medieval conditions to the most modern type of life is truly one of the most dramatic phases of the Soviet revolution.

Lella is only twenty-two. She was seventeen when she discarded her veil and abandoned the harem into which she had been sold at thirteen. She is the mother of two children. For months after she removed the veil Lella remained indoors, ashamed to show her face. By now unveiling is widespread, but at that time it was still an act calling for courage; many women were murdered by their own families for such conduct.

Every one in Baku knows Lella Mamed-Bekova and can point out the house where she lives. Lella is a symbol of pride to the new type of women in the Soviet Near East—and an object of hatred to those who adhere to the ways of their mothers.

An eminent bacteriologist says that boiling is the greatest safety device against botulism, the serious food poisoning which results from eating defectively canned foods.

A special automobile highway across the Sahara Desert from Cairo to Suez may be constructed soon.

The modern spiritualistic movement goes back to the year 1848.

Real "Alice" of Wonderland

Many people whose happiest childhood days were spent over a copy of Lewis Carroll's immortal "Alice in Wonderland" will soon have a chance to see the original Alice who inspired the famous story, in the person of Mrs. Alice Hargreaves, who is coming from her home in England to attend the Lewis Carroll celebrations at Columbia University, New York. Mrs. Hargreaves is shown at the left as she appeared when a girl; and at right as she is today.

Market For B.C. Fish

Frozen Herrings Are Finding Ready Sale In Hong Kong

White residents of far-away Hong Kong have recently been introduced to a new fish food, from British Columbia in the shape of frozen herring and they are reported to have received it with relish. Enterprising fish people in British Columbia, alert to find and develop new markets, have discovered that their frozen herrings are welcomed in the British settlement at Hong Kong.

For many years past British Columbia fish producers have done a large business with China in dry-salted herring, but the export of frozen herring to Chinese ports is a new development. The dry-salted herring shipped to China are used by the Chinese people themselves, while the sales of frozen herring in Hong Kong have been made to white consumers.—Fisheries News Bulletin.

To Speed Mails

Planes To Be Catapulted From Ships At Sea

German seaplanes, catapulted from the decks of the North German Lloyd liners "Bremen" and "Europa," will make 36 scheduled ship-to-shore flights with trans-Atlantic mails, according to an announcement.

Undaunted by the tragedy last year, when the seaplane New York, from the "Bremen," crashed on Cobequid Bay, N.S., and carried two aviators to their deaths, the company now intends to establish a permanent service. The route, with a stop at Sydney for fuel, was marked by Joachim Blankenburg and Karl Kirchhoff during a successful flight last September. The first flight this year will be westbound, a plane catapulted at sea 600 miles east of Sydney and flying to Sydney and thence to New York via Cape Cod.

One of the questions in a general knowledge test held at a local preparatory school was:

"Who is Bernard Shaw?"

Among the replies was:

"The old man who always puts his photo in the paper."

Although all ingredients had to be imported 1,000,000 pounds of macaroni were made in Switzerland last year.

Wanted Plenty Of Action

Theatre Box Office Man Given Unusual Surprise

One recent morning a gentle peace pervaded the box office of the John Golden Theatre, New York, where "Riddle Me This" with Frank Craven and Thomas Mitchell were holding forth. It was a trifle too early for the customary queue of peacelovers to form at the ticket window and Richard Hopkins, house manager, was loitering at his counter.

Presently, from the corner of an eye, he noticed a limousine draw up at the curb on Fifty-Eighth Street, and a neatly dressed chauffeur leap to the sidewalk and open the door. There stepped from the confines of the townsome a little, white-haired lady, with a small lace bonnet perched on the summit of her modest coiffure. She moved timorously across the pavement and came to the window.

"If—if you wouldn't mind," she said shyly, after taking out her purse, "I would like to ask a question about this play."

"Why, of course," said Mr. Hopkins. "What do you want to know?"

"This is, ah, a play about a murder, isn't it?"

"Yes, ma'am, it is."

"Tell me," she said, "are there any pistol shots?"

Mr. Hopkins smiled. He was relieved.

"No, Madam," he replied. "You have nothing to fear. There is not a single pistol shot in the whole play."

"Not one?"

"Not one. Not a pistol shot! No, not even a loud noise."

"No pistol shots?"

"None."

"Well, then," said the old lady, firmly. "I'm sorry." She took back her money and put it in her purse.

"When I go to the theatre, I want pistol shots—good loud ones."

And with that, she moved out of the theatre again, stepped into her limousine, and was driven, at a snail's pace of safety, away. Mr. Hopkins returned two seats to their place in his rack.

"Oh, save my hair! Save my hair," she cried, pointing to a wig rapidly drifting out to sea.

"Madam," replied the gallant life-guard, as he took a firm grip on her shoulder. "I'm only a lifesaver, not a hair restorer."

Fighting the Bergs

Patrol Of the North Atlantic Steamer Lanes By U.S. Navy

Immediately after the "Titanic" catastrophe the United States Navy established the first ice patrol on the north Atlantic steamer lanes, and it has been continued ever since, the work being done by the United States Coast Guard and paid for by fourteen maritime nations whose ships it defends. It is a warfare almost wholly of strategy. Attempts have been made to destroy the bergs, but have never succeeded. The only thing to be done is to meet the invasion when it appears in early spring, to predict its course and probable extent by study of currents and temperatures, to plot and broadcast the position of individual bergs as they approach the steamer lanes and track them until they are disintegrated by their natural enemies—sun and warm weather. Each year two Coast Guard cutters spend some four months or so along the battle line between the Gulf Stream and the Labrador current, acting as a general staff for the merchant ships until the invasion is past.

Sometimes it is an invasion in force. In the "Titanic" year more than a thousand bergs came down into the vicinity of the Grand Banks; last spring for the first time in the twenty years that the war has been on, not a single berg got past the danger line over the tail of the Banks in 43 degrees north, and only four got south of Newfoundland. The Coast Guard improved the opportunity to pursue them into their home waters, expecting to find the ice navy stranded along the coast of Labrador as a result of the warm weather. The wrecks of some were discovered, though most had already perished by the time the Coast Guard got there.

The patrol is now out again, and may not be back until July. The life it is said, "is not so hard or tedious," the work is interesting, and it is well done. The patrol might not have saved the "Titanic," since she had no warnings and failed to slow for them; but the patrol is an important duty, since that frightful morning twenty years ago, not a single life has been saved, the steamer lanes through collision with ice.—New York Herald-Tribune.

People Have Queer Tastes

Tattoos! Tells Of Strange Designs Chosen By Clients

An instance of the peculiar tastes of some people is recounted by Candide in the Sunday Pictorial, who reports an interview with Prof. Bunt, chief, tattooist of London, England.

"A number of titled women are among my clients," said the Professor proudly. "Often I see a society's beauty's picture in the paper and realize that she was the woman upon whose leg I tattooed, say, a butterfly long before." He went on to tell interesting details. Things like this: "I often wonder why Lady—well, why one well-known woman got me to put two large green snakes round her."

A surgeon whose name is often in newspapers is also decorated with similar thoroughness; but many people who call at the little shop do so for more ordinary beauty treatment. "I have just finished an actor," the Professor told me. "I put some color in his cheeks and whitened his red nose, and now he looks a new man. One man recently insisted that a scar should be tattooed across his face, while a woman brought in a child to have two small birthmarks tattooed."

One Form Of Madness

Nations Needing Money Spend Billions Yearly On Armaments

Every day new evidence is afforded that this is a mad world. The nations are headed for bankruptcy, yet they are spending more than four billion dollars yearly on armaments—think of it, \$4,000,000,000. All of them have renounced the right to wage war. And a hundred million of their people are in dire want.

Should the disarmament conference now proceeding at Geneva arrange for a fifty per cent. reduction in expenditures on armaments, the ultimate saving would be two billion dollars per year or five million dollars per day. Of this saving \$1,200,000,000 would be made by Europe, which is close to economic collapse, and \$350,000,000 by the United States.

Until the masses of the people everywhere join with business interests in demanding that the waste of money on military preparations be curtailed the world will continue that form of madness.

Teacher—Sammy, do you know what a gentleman farmer is?

Sammy—Yes, ma'am. It's a man who loves cows but don't know how to milk 'em.

Vancouver's Shipping Growth

Both Exports and Imports Show Increased Volume and Outlook Is Encouraging

Flour, grain, canned salmon, lead, logs, lumber and newspapers, comprising the basic industries of the west, had all increased export volume through the port of Vancouver during the first three months of the current year, F. C. Brown, chairman, said in presenting his annual report to the British Columbia division of the Canadian Manufacturers' Association. Altogether, exports through Vancouver, compared with the same period last year, increased eleven per cent, while imports had increased six per cent. In the case of grain export, the increase amounted to more than three million bushels.

The neighboring port of New Westminster showed an even more remarkable advance. Its exports increased thirty-six per cent, accounted for chiefly by lumber, while its imports had almost doubled.

"I do believe that the bottom of commodity price has at last been reached, and it is reasonable to look for an improvement from now on," Mr. Brown said. "It would even go so far as to say that this improvement is already in evidence in some instances."

Referring to Vancouver as a grain port, he said: "We are justifiably proud of our record of having in twelve years from a very small beginning achieved the position of being the leading grain shipping port to the ports of the Seven Seas."

"We are none the less proud of the fact that in carrying on this development, we have thereby created another community of interest with prairie provinces."

Tooth Of Baby Mammoth

Interesting Discovery Is Made In Saskatchewan Vegetable Garden

A baby mammoth shed one of its milk teeth and probably shed baby mammoth tears some 5,000 to 10,000 years ago, where W. A. Wilson of Indian Head now has his vegetable garden.

The tooth, wonderfully preserved with the enamel still of the best ivory quality, was taken by Mr. Wilson to the geology department of the University of Saskatchewan and was referred for identification to C. M. Sternberg of the geological survey at Ottawa, who is an authority on mammoth teeth. He identifies it as the second lower milk molar from the side of a tooth of a baby "Elephas Primigenius."

It is not a great tooth like that of the mammoth whose skeleton was disinterred by a road construction gang at Wistons last year. The chewing, or perhaps one should say the sucking, surface of the tooth is about 2 1/4 by 1 1/4 inches.

Mr. Sternberg says that finds of first and second molars are rather rare.

"I wish I knew how to make a barrel of money," sighed the Little Man.

"That's easy," replied the Big Man. "Spend a half a barrel of money in advertising and you'll soon have a barrel of money."

Colorado's sand dunes, unique wonders of nature in a land that knows more rock than sand, are attracting many tourists. The hills are so smooth that skis can be used on the sand.

Government scientists say that the slow process of erosion has changed the surface of the earth more than all the earthquakes, volcanoes, tidal waves, tornadoes and excavations in history.

Because illiteracy is so prevalent in China, its leaders find the radio of inestimable value in unifying the country.

Residential rents in Hawaii are gradually dropping.

"My husband talks all night long his sleep."

"Well, you should let him get in a word in the daytime."—Musketts, Vienna.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FIEDLER
Author of
"The Splendid Folly," "The Hermit of Far End,"
Hodder & Stoughton, Ltd.

CHAPTER XX—Continued.

She paused, and the liquid in the black pot over the fire settled up suddenly and filled the silence with its chuckling and gurgling, so that to Jean it seemed like the sound of some hidden malevolence chortling defiance at her.

"The old woman clutched her hand a little tighter, turning the palm so that the light from the tiny window fell more directly upon it."

"There's a castle waitin' for 'ee, me dear," she resumed in the same sing-song voice as before. "I can see it so plain as plain. But you won't never live there wif the one you love, though you're hopin' for it. I see ruin and devastation all around it, and the sky as red as bill above it."

She released Jean's hand slowly, and her curiously bright eyes fastened upon Tormarin.

There is
NO ODOR
from FISH

or from
Vegetables cooked
in CANAPAR

Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal up in Canapar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner turned low. Canapar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-crusting afterwards.

Special Offer

CANAPAR is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to you a new and unique book entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Enclosed find 25¢ for which please send me one full size package of CANAPAR COOKERY PARCHMENT and your 100 recipes for "Leftovers".

looked at Burke now, in astonishment.

"You certainly are not," she replied quickly. "I shall go back as I came—in the car."

"Quite impossible. It's broken down. They rashly brought on the lunch hampers in it, across that God-forsaken bit of moor road—with disastrous consequences to the car's internals. So that you and Tormarin have got to be sorted into other conveyances. And I've undertaken to get you home."

Jean's face fell a little. Throughout the drive up to the Moor Blaise had seemed less remote and more like his old self than at any other time since their quarrel, and she could guess that this arrangement of Burke's was hardly likely to conduce towards the continuance of the new peace.

"How will Blaise get home?" she asked.

"They can squeeze him into her car, Judy says. It'll be a tight fit, but he can cling on by his eyelashes somehow."

"I think it would be a better arrangement if you drove Blaise and I. There's certainly not room for two extra in the car. There isn't really room for one."

"There wouldn't be two. You really drive Blaise."

"Pardon me. I should do nothing of the sort."

"Do you mean?"—incredulously—"that you would refuse?"

"Oh, no," he said, attempting to speak lightly. "This lady's fortune isn't sufficiently encouraging for me to venture."

The giggy's eyes never left his face. She nodded slowly.

"That's as may be. For the zaim luck and zaim ill-luck will come to you as comes to thick mud. There's no ring given or taken, but you'll bound together so fast and firm as wedding-ring could bind 'ee."

Jean felt her face flame scarlet in the dusk of the tiny room, and she turned and made her way hastily into the sunshine once more, thankful for the eager queries of Nick and Claire, which served to bring back to normal the rather strained atmosphere induced by the giggy's final comment.

As they climbed the side of the tor once more, Jean relaxed into silence. More than once, more than twice, since she had come to England, she had been vaguely conscious of some hidden menace to her happiness, and now the giggy had suddenly given words to her own indefinite premonition of evil.

"For there's darkness comin' . . . black darkness."

It was a relief to join the rest of the picnic party, who were clamouring loudly for their lunch, good-humouredly indignant with the wanderers for keeping them waiting.

"Another five minutes," announced Burke, "and we should have begun without you. Not even Lady Anne could have kept us under restraint a moment longer."

The party was quite a large one, augmented by a good many friends from round about the neighborhood, and amid the riotous fun and ridiculous mishaps which almost invariably accompany an alfresco meal, Jean contrived to throw off the feeling of oppression generated by Keturah's prophecy.

Burke, having heaped her plate with lobster mayonnaise, established himself beside her, and proceeded to catch her about her recent experience.

"Did the lady—what's her name, Keturah?—tell you when you were going to marry me?" he demanded in a low undertone, his dark eyes laughing down at her impudently.

"No, she did not. She only foresees things that are really going to happen," retorted Jean.

"Well, that is"—composedly. "She can't be much good at her job if she missed seeing it."

"Well"—Jean affected to consider—"the nearest she got to it was that she saw 'darkness coming' . . . black darkness."

Under cover of the general preoccupation in lunch and conversation, Burke's hand closed suddenly over hers.

"You little devil!" he said, half amused, half sulky. "I'll make you pay for that."

Out here, in the wind-swept, open spaces of the Moor, Jean felt no fear of him.

"First catch your hare!" she retorted defiantly.

He regarded her tensely for a moment.

"I'll take your advice," he said briefly. Then he added: "Did you know that I'm driving you back in my car this afternoon?"

Various cars and traps and saddle horses had brought the party together at the appointed rendezvous—a little village on the outskirts of the Moor, and Jean had driven up with Blaise in one of the Staple cars. She

Down in Weight and Very Pale

Mrs. Beare Thankful For Way in Which Dr. Williams' Pink Pills Helped Her Back To Health

"I can truly recommend Dr. Williams' Pink Pills for they did wonders for me," writes Mrs. Mable R. Beare, a New Westminister, B.C. "After a long and very trying illness, I was down to 80 lbs. in weight. I could not eat a hearty meal. In fact, I have had to go away from the table hungry, from a dinner I dared not touch. I was also very pale. I had often read about Dr. Williams' Pink Pills, so I thought I would give them a trial. I soon found I was able to eat with any one, and life began to look brighter. My weight came up to 118 lbs. and my lips and cheeks had lots of color. I am more than thankful I ever took Dr. Williams' Pink Pills, and I only hope others will try them."

Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason they have given new vitality and strength to thousands of such nervously exhausted women. Equally helpful for growing girls. Try them. At your druggist's in the new glass container, 50c.

"What's the matter?" For God's sake don't look like that, Claire!"

Slowly, with difficulty, she wrenched her eyes away from that sleek, conventional figure in the dark green liveries.

"Don't you see who it is?" she asked in a harsh, dry whisper.

Before Nick could answer, the man had made his way to Claire's side and paused respectfully.

THE RHYMING OPTIMIST

By Aline Michaelis

THE RICHEST HOUSE

This little house is very bare
And very poor and old,
Its tenants live on meagre fare
And suffer cold.

Sometimes a passer feels concern
For those who dwell inside,
And wishes that they did not yearn
For wealth indeed.

Oh, eyes that stare and do not see,
Oh, heart that holds no dreams,
Yours is the house of poverty
And where no joy gleams!

This little house is very cheap
And very dim and small;
Yet here peace lulls to happy sleep
And faith cheers all.

And here dwell love and song and
And every kindly grace;
Perhaps the richest house on Earth
Is this poor place!

Mothers Value This Oil—Mothers who know how suddenly croup may smother their children and how a very prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Moslem Girl Becomes Pilot

Abandons Harem To Win Fame As Soviet Flyer

Less than five years ago Lella Mamed-Bekova, a Moslem girl in Baku, was wearing the horse-hair veil prescribed for wives, and living in the harem of an old-fashioned husband several times her age. Today Lella wears pilots' tops, flies an airplane and teaches at the aviation school. She is known throughout the Soviet Republic of Azerbaijan as the first woman flyer in that region.

Her life's story is being recounted in the journals of this country as an example of the strides being made by Eastern women. Their transition from medieval conditions to the most modern type of life is truly one of the most dramatic phases of the Soviet revolution.

Lella is only twenty-two. She was seventeen when she discarded her veil and abandoned the harem into which she had been sold at thirteen. She is the mother of two children. For months after she removed the veil Lella remained indoors, ashamed to show her face. By now unveiling is widespread, but at that time it was still an act calling for courage; many women were murdered by their own families for such conduct.

Every one in Baku knows Lella Mamed-Bekova and can point out the house where she lives. Lella is a symbol of pride to the new type of women in the Soviet Near East—and an object of hatred to those who adhere to the ways of their mothers.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning. Kills skin inflammation. Removes foot flesh.

New York state contains 49,204 square miles.

What Might Happen

If the glaciers Should Melt, Ocean Waters Would Deluge the Earth

Just raise the average temperature of the earth two or three degrees and you can bid good-bye to all the big cities on earth. Glaciers will melt and oceans will rise, and—

But, let the weather man get in on this. Dr. William J. Humphreys, of the United States weather bureau, took a lot of evidence to make up the painstaking case, presented to the American Meteorological Society, that the earth's glaciers, if melted, would raise the ocean level 150 feet, and that the aforementioned slight increase in warmth would do the melting.

One could still be dry above the 15th floor level in cities with skyscrapers, but all about would be the bounding waves. London, Paris, New York, Montreal, Philadelphia, Los Angeles, Washington, Shanghai—all gone.

By way of cheer, Dr. Humphreys pictured the world as delicately balanced between this catastrophe and the equally cheerless prospect of another glacial period. It would take but a drop of five or six degrees in the earth to bring back the ice age, with Canada and the United States as far south as Kentucky and Iowa now skating rink.

But skating enthusiasts needn't cheer. Dr. Humphreys said the earth is gradually growing warmer and the next ice age, although forecast, is some millions of years off. So, probably, is the glacier melting period.

SHE HAD TO CRAWL TO BED

One stair at a time—on her hands and knees—that was how she had to do it. And when she did get to bed, her troubles were not over.

"Twelve months ago I could not sleep on account of the terrible pains in my knees, and I might say in all my joints. At night I could only crawl up to bed, one stair at a time. But since taking Kruschen Salts regularly, I have entirely lost all pains and stiffness, and, if needed, could now run upstairs two at a time. In fact, I feel 10 years younger. I shall never be without Kruschen Salts."—Mrs. A. E. D.

Do you realize what causes rheumatism? Nothing but sharp-edged uric acid crystals which form as the result of sluggish eliminating organs. Kruschen Salts can always be counted upon to clear those painful crystals from the system. The six salts in Kruschen are bound to dissolve away all traces of uric acid. And more! They ensure such perfect internal regularity that no such body poisons as uric acid are ever able to accumulate again. Prove this for yourself by buying a bottle of Kruschen.

Little Helps For This Week

"And now I exhort you to be of good cheer."—Acts xxvii. 22.

Make me as one that caetheth not by day.

A dainty shadow, but reflecting eye One little beam, loved, warmed, and golden caught From the bright sun that lights our daily way.

You find yourself refreshed by the presence of cheerful people; why not make earnest efforts to confer that pleasure on others? You will find half the battle is gained if you will never allow yourself to say anything gloomy.—Lydia M. Child.

Western Enthusiasm Completed Bay Route

Now Up To People To Support Faith With Words

The people of western Canada should heed what Dr. Manion has said. It was the enthusiasm of the western provinces that carried the Hudson Bay route to completion. The people of the west should support their faith with words. Once it is certain that there will be ships at Churchill it should be made certain that grain will be there if it is moving anywhere—and no influence which the C.N.R. and the C.P.R. and the port of Montreal can exert should be allowed to prevent the sending of cargoes by way of Hudson's Bay.—Toronto Star.

Worms are encouraged by morbid condition of the stomach and bowels, and so subside. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

The largest lobster cannery in the world is slated to be one at Pictou, Nova Scotia.

Living costs in Germany are dropping.

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Nerving pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you lots of needless suffering! Be sure you get Aspirin—not a substitute!

THE Chinese population of California is estimated 37,000.

The last session of U.S. congress saw the introduction of 6,041 bills.

When Waterloo Bridge in London, England was built 120 years ago several sovereigns were buried in a block of granite forming part of it. When this bridge is pulled down each of these sovereigns will be worth 27s. 6d. when recovered, but had they been invested each of them would now be worth about 100 pounds.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Mother's Day Fittingly Observed in Chinook United Church

A combined service of "Mother's Day" and Sunday School Rally Day was held in the United Church on Sunday, May 8, at 3 p.m., Rev. Mr. Woollett, pastor, presided. The Sunday school order of service was observed, which opened with an instrumental prelude by Miss Marjorie Lee; Sunday school organist, Miss Joan Bayley, gave a reading, also Lorne Rideout, Rev. Mr. Woollett then introduced Rev. R. W. Hibbert, of Calgary, secretary of religious education for the United Church. Mr. Hibbert delivered a most impressive discourse on "Mother's Day" to a fairly large audience.

The church was beautifully decorated with house plants. Contributors were: Capt. C. O. Peters gave his beautiful large window box, Mrs. W. W. Isbister, Mrs. F. Otto and Mrs. W. C. Barton.

Oh, Mother Dear!

(To the tune of "Wearing of the Green")

Oh, can't you feel
Oh mother dear
Your boy who's far away
Is thinking of you all the time,
And longs for you each day.

Chorus

Oh, can't you hear, oh children dear
Her voice so sweet and clear?
So worship her while she's alive
As long as she is here.
Oh, Mother dear, we hear you now,
And love you all the time!
Devotion always is for you
Oh, mother dear of mine.

And when there's mail
From mother dear,
He's happy all the day.
You see the smile upon his face
Although he's far away.

And when he writes—
To mother dear
His heart is full of joy;
The tears are coming to his eyes
His mother's wand'ring boy.

And when his thoughts—
For mother dear
Is pouring from his heart,
He's longing for her dearest lips
Tho' miles they are apart.

And when his heart—
For mother dear
Is overflowing with love
To see her pleading, loving eyes,
From home no more he'll rove.

A purer soul
Than mother dear
There never has been known;
So love her while you have the
chance

Sweet mother dear your own.

—By Capt. C. O. Peters, Chinook, Alberta.

(As this will be sung at the lecture, "Lost at Sea," to be given by Capt. Peters in the Chinook ballroom on Friday evening, May 13, it would be well for our readers who intend to be present to clip these verses out of the paper and bring them along so as you will be enabled to join in the singing of this beautiful dedication to "Mother.")

Heard Around Town

Miss Mathieson spent the week-end with Berrydale, Alberta friends.

Lester Berry has been appointed night caretaker at the C.N.R. station.

Messrs. O. Meilke and Capt. Peters were Oyen visitors on Wednesday.

Miss Eileen Bjork, of Atlee, was the guest of Miss Madeline Otto, Wednesday.

Mrs. Fields and Miss H. Dahl, of Sedalia, were the guests of Mrs. Fred Otto last Friday.

Mr. Pfeifer, of Alsask, spent the week-end with his brother, E. Pfeifer, night operator at the station.

Carl Otto, J. W. Lawrence and Ole Rudy were among the winners in the puzzle contest conducted by the Country Guide, Winnipeg.

High School Inspector Fuller, Edmonton, paid Chinook Consolidated school an official visit on Wednesday.

Principal Schultz, of Youngstown school, and Principal Richardson, of the Cereel school were Chinook visitors Tuesday.

Mr. Martin, relieving operator on this division of the C.N.R., is here during the absence of A. V. Youell who is enjoying his vacation.

J. M. Davis, who has had a long experience in farming, in talking to the editor the other day, stated that he had never before seen ground in such perfect condition at seeding time as it is in this district this year.

A great treat is in store for all those who attend the free illustrated lecture, "Lost at Sea," to be given by Capt. Peters in the ballroom of the Chinook hotel tomorrow evening, Friday, May 13. These pictures have never been shown in Canada before, and are not fake stereopticon slides but genuine photographs of scenes which took place. They are educational, instructive and interesting. You may never again have the opportunity of seeing these most exceptional marine pictures free. There will also be community singing from songs shown on the screen. The Capt. has yet to fail to make good on any entertainment he has sponsored, and he guarantees next Friday evening to be one that will linger long in the memory of those who attend. In the near future the Captain's intentions are to install a moving picture machine and give a high-class picture show with the latest news reel and winding up with a roaring comic every week.

Mr. Bjork, of Atlee, paid Chinook a business call Wednesday.

Mesdames Lee, Vanhook, Nelson and Jacques are Hanna visitors today, (Thursday).

Miss Mae Petersen, proprietor of the Chinook Beauty Parlor, left Wednesday morning for Drumheller where she will visit with relatives for a few days.

On Sunday, "Mother's Day," a delightful re-union of the Stewart families was held at the home of Mr. and Mrs. R. D. Stewart in honor of Mrs. Eliza Stewart, who recently returned from Calgary where she had spent the winter. Those present were Mr. and Mrs. R. Stewart, Mr. and Mrs. Ed Stewart and Jean, Messrs. D. J. and H. D. Stewart, Miss M. E. Smith, Mr. and Mrs. N. D. Stewart and Grace. Mrs. Stewart expects to spend the summer in this district.

Peyton Pickings

'Born—To Mr. and Mrs. Fred Helmut, on April 8, a son.

Mrs. Wm. Davis has been nursing at the Belmont home for twelve days.

Farmers in this district are delighted at the prospects of a bumper crop this year.

The Menace of Soil Drifting

If Alberta farmers don't soon start in to control soil drifting in earnest, in a few years they won't have farms worth owning.

That may look like an alarmist statement, but there is every indication that it is accurate; soil drifting is the big agricultural problem facing Alberta today.

Of course it may not be so troublesome this spring. The likelihood is that it will not. But other springs are "coming" and windy ones, too.

For years the great wheat belt of Saskatchewan centering on Regina and Moose Jaw, was an agricultural Eldorado. It actually produced more gold than any gold mine in Canada ever

turned out.

What is that area today?

A waste and despoiled country with roadsides filled with invaluable top soil, peopled by apprehensive and discouraged farmers and townspeople. It has received a blow from which it will take years to recover because soil drifting was never dealt with intelligently.

The prairie west is also subjected to soil drifting and each passing year sees the soil condition becoming more susceptible to that menace.

When a series of dust storms takes away one inch of top soil on one acre of good Alberta farmland it carries off 300 pounds of phosphorous, 1,500 pounds of nitrogen and 15 tons of organic matter.

Two hundred dollars' worth of commercial fertilizer won't restore the loss of that plant food. Twenty wheat crops each of 50 bushels would not use up the phosphorous carried off that acre by the wind.

That's losing real money and losing it fast! It's a serious thing whether people realize it or not.

There are means of controlling soil drifting and every farmer should know and practice them. Professor Wyatt, of the University of Alberta, outlined the most practical methods as follows:

1. Regulate time of plowing so that soil is not moist when plowed.

2. Leave the surface rough; beware of implements which pulverize the surface soil.

3. Control weeds on summer-fallow by using such implements as the rod weeder, duckfoot cultivators, etc., which would not disturb and pulverize surface soil.

At critical time keep surface soil ridged at right angles to prevailing wind by using lister plow; even springtooth harrow may do, provided the surface soil is moist.

5. Spread manure on the spots most likely to start blowing.

6. Alternate strips of crop and fallow.

7. Use summerfallow substitutes such as corn, sunflowers, sweet clover.

8. Use systematic rotations, including a certain amount of grass crops, and keep some livestock, thus maintaining the fibre in your soil.

9. Include a fall cereal such as rye in your rotation.

10. Do not have too large areas of fallow in one field or in adjacent fields.

11. Plant more trees for windbreaks.

Here and There

Exports of Canadian wheat during the month of March totaled 9,920,634 bushels, of which only 71,288 bushels were routed through United States Atlantic seaboard ports.

Canada's butter exports to the British Isles and other countries totalled 10,680,000 pounds in 1931, as compared with only 1,180,400 pounds in 1930.

Canada's bread and bakery products industry showed production to a value of \$73,594,894 during 1930, through 2,698 establishments of which 1,071 are located in Ontario and 868 in Quebec.

March was the year's best month, to date, for pig iron production in Canada, with a total of 17,899 tons, at a rate of 590 tons per day, as compared with 363 tons per day in February and 332 in January.

W. G. Chester, dean of Canadian railroad veterans, has just retired, in Winnipeg, after 25 years in the service of the Canadian Pacific Railway and another 25 with the Brotherhood of Railway Conductors.

Excursions run by the Canadian Pacific Railway between various points in Eastern Canada have met with unequalled success. To date, some 17,000 persons have been carried on visits and holidays, over different week-ends, by this means.

The 1931 census shows 728,244 occupied farms in Canada, or 17,154 more than were shown when the count was taken in 1921. Quebec, Manitoba, Saskatchewan, Alberta and British Columbia are responsible for the increase, with the last-named in the lead.

Navigation opened in Montreal on April 18, with the Canadian Pacific freighter Beaverburn the first trans-Atlantic ship in port. Her master Captain E. Landy, receiving the roll-headed cane, presented annually by the Harbor Commissioners, for this exploit.

Passenger honors in the trans-Atlantic service also fell to the Canadian Pacific, when the liner Montclair docked on the afternoon of Tuesday, April 19, as the first passenger ship to arrive in Montreal. Thus too C. P. R. claims double honors for the 1932 season.

Liverpool witnessed an unique event on April 6, when 760 British boys and girls disembarked from the Canadian Pacific liner Montclair, docked on the afternoon of Tuesday, April 6, as the first passenger ship to arrive in Montreal. Thus too C. P. R. claims double honors for the 1932 season.

Some weird stories have been told of feline sagacity, but the open record would appear to be held by a Siamese cat, which "stowed away" on the Canadian Pacific liner Empress of Britain, when she left England to go to New York to begin her world cruise last winter. Puss finally decided to show herself when the ship was half-way through her long trip. The Empress got a rousing welcome in New York when the trip was over, and the much-travelled cat was delivered to its owner, in the Southern States. (397)

Date Changed

The illustrated lecture, "Life at Sea," to be given by Capt. C. O. Peters which was announced in last week's issue of the "Advance" for the King's birthday, June 3, has been changed to Friday evening, May 13, so as not to interfere with other sports being held in the district on that date.
